

Antigone Peyton leads the Intellectual Property and Technology Law practice at Protorae Law in the Washington, DC area. Antigone's focus on IP and tech law issues includes a particular interest in social media, IoT, cybersecurity, blockchain, data analytics, and AI. A prolific speaker and technophile, Antigone regularly writes and speaks about the practical impact of privacy regulations, data security issues, cloud computing, cryptocurrency and blockchain tech, social media platform activities, and other technology law complexities.

Before she joined Protorae Law, Antigone founded an intellectual property and tech law boutique firm and managed the e-discovery group at Finnegan in Washington, DC. Before law school, Antigone conducted scientific research involving biophysics and magnetic resonance studies at a large university medical center. All of these experiences sharpened her focus on the business impact of the law and the practical aspects of technology innovation.

You can find her musing on Twitter's platform (@AntigonePeyton) and blogging at DecodingIP.com.
